Summer 2015

Message from Me Newsletter

## Service Provider No Longer Needed

This upcoming school year, you will no longer need to collect cell phone service provider information in order to send text messages to parents. Only a cell phone number is needed, thanks to a change in our underlying message sending technology. Parents may still receive messages by email as well.

## Visual Message Prompts

Download free printouts from the MessageFromMe.org Resources page. Use these visuals to send quick and easy messages about parent meetings, field trip reminders, class visitors, or other class activities. We recommend laminating and using a white board marker.

## Clean up for the New Year

Quickly delete students who have graduated from your center:

- Log in to [www.MessageFromMe.org](http://www.MessageFromMe.org)
- Click "My Center" link and scroll to "manage enrollment"
- Click "Delete Graduating Students"
- Check the box next to any students who have graduated from your center. (Note don't delete students who are still at your center but moving on to a new class! Make these changes by editing Groups instead.)
- Click the "Delete" button

### Website Update

It's now easier to see if parents do not have any saved contact information. Users with no contact info will be flagged on both the "Students" and "Users" list pages making it easier to notice missing info at a glance.

### New Feature

In the newest version of the app, children can pick multiple recipients for a single message (ex: Mom & Dad). Download the latest version from the app store!
